

Battling Batten Disease A Childhood Illness

* WHAT IS BATTEN DISEASE?

* A fatal, inherited neurological disease that primarily affects children.

* This degenerative disease takes their childhood and then takes away the child.

* This illness is not treatable, nor curable as.....

"THE CURE DEPENDS UPON US"

* HOW CAN YOU HELP?

* Visit our website: www.battens.org.au
Government and public support are needed to provide the resources to support scientists pursuing medical research.

* Become a Battens cause volunteer

Help solve the puzzle and save a child's life

Donations over \$2 are tax deductible and can be made via

www.battens.org.au
